SELF-ADHERENT, ABSORBENT SACRAL DRESSING WITH SAFETAC®

- Redistributes shear and friction forces and provides an optimal skin microclimate to reduce the risk of pressure ulcers¹-⁸
- Seals the wound margins to reduce the risk of maceration
- Protects peri-wound area from skin stripping
- Comfortable, conformable and easy to use

Film backing with dynamic permeability
- Advanced fluid handling promotes optimal moisture balance
- Showerproof, bacteria and viral barrier¹ to protect the patient and the clinician
- Thin semi-transparent border for enhanced fixation and security
- Lower friction coefficient for secure fixation

Shaped to fit
- Allows precise application
- Ensures maximum skin contact
¹ microbes larger than 25nm

Enhanced “moisture control” foam pad
- Advanced multi-layered construction
- Controls moisture content and locks exudate in
- Provides optimal fluid uptake
- Maintains integrity
- Conforms to body contours

3-part release system
- Easy to use

Specially shaped to fit, protect and promote moisture balance.

Only Mepilex® Border Sacrum offers the benefits of Mepilex® Border and Safetac® technology in a dressing designed specifically to fit the sacral area.

Safetac® technology

Safetac® is a patented soft silicone adhesive technology. Dressings with Safetac® technology are atraumatic both during wear and upon removal. These dressings minimize trauma to the wound and the surrounding skin, which minimizes pain to the patient. They also prevent maceration by sealing around the margin of the wound to protect peri-wound skin.

For more information visit www.safetac.com
How Mepilex® Border Sacrum works
Mepilex® Border Sacrum is a self-adherent foam dressing with advanced fluid handling capabilities, dynamic permeability and all the advantages of Safetac® soft silicone technology. It adheres gently to surrounding skin but doesn’t adhere to moist wound tissue, thereby minimizing trauma to the wound and peri-wound area and pain to the patient. It is water proof, viral proof and bacterial proof with a multilayered wound pad construction designed to promote optimal moisture balance and fluid uptake.

Indications
Mepilex® Border Sacrum is specifically shaped to fit the sacral area. It can be used as a primary dressing on shallow wounds or as a cover dressing for deeper wounds. Ideal for wounds with moderate to heavy exudate. Mepilex® Border Sacrum may be used as part of a prophylactic therapy to help prevent skin damage, e.g. pressure ulcers.1-8

Precautions
In case of clinical signs of infection, the use of Mepilex Border® Sacrum may be continued in conjunction with appropriate treatment.

Mepilex® Border Sacrum may aid in the prevention of pressure ulcers by protecting the skin from moisture, friction and shear when used in combination with comprehensive pressure ulcer prevention protocols.1-8

Application Guidelines
3-part release system for easy application

1. Cleanse the wound and dry the surrounding skin thoroughly. Remove the centre release film.
2. Apply the adherent side to the wound (do not stretch).
3. Remove the side release films.
4. Gently smooth each side into place.

To remove
1. Gently lift one corner and slowly peel dressing back.

Benefits of Mepilex® Border Sacrum
- The soft silicone layer moulds to the uneven surface of the skin, thus creating micro-adherence for secure fixation over a large contact area
- Minimizes leakage and maceration
- Enhanced fluid handling capabilities
- Secure and gentle fixation
- Low friction coefficient
- Minimizes trauma, pain and skin stripping
