

Hydrolock® Technology

Gelling fibre dressings reinvented

Aquacel® gelling fibre dressing

Exufiber® gelling fiber dressings

Under the microscope:

- Unique material; patented processing method
- Tightly entangled fibres that minimize free space; reducing exudate leakage and increasing dressing integrity
- Excellent tensile strength allowing for easier removal and reduced risk of leakage and maceration

The silver effect:

Contact with fluid initiates controlled release of evenly distributed silver ions that work against pathogens

Exufiber® brand dressings:
The gelling fibre dressings you would design

Exufiber®
with Hydrolock® Technology

Product Code*	Size (cm)	Pcs/box	Pcs/case
709900	5 x 5	10	40
709901	10 x 10	10	60
709903	15 x 15	10	60
709904	20 x 30	5	25
709909	2 x 45	5	20

*All products sterile packed.

Introducing
Exufiber® Ag+

The gelling fibre dressing you would design

Reduce the risk of infection with Exufiber Ag+¹⁻⁴

Exufiber® Ag+
with Hydrolock® Technology

Product Code*	Size (cm)	Pcs/box	Pcs/case
603421	5 x 5	10	40
603425	10 x 10	10	60
603423	15 x 15	10	60
603424	20 x 30	5	20
603420	2 x 45	5	20

The **Safetac** TECHNOLOGY difference:
Less Trauma. Less Pain™

Together with a secondary dressing with Safetac technology, Exufiber brand dressings create a unique treatment option for highly exuding wounds while minimizing trauma to the wound and surrounding skin.⁹⁻¹¹

Exufiber Ag+ offers clean, easy removal, reduced risk of skin damage

+ superior antibiofilm action.^{1-6,8}

Lock in fluid and harmful bacteria with Exufiber brand dressings: complete with Hydrolock Technology!

Mölnlycke®

Exufiber®
Exufiber® Ag+
#1 in fluid retention⁷

It's all about the outcome

Mölnlycke®

Exufiber® brand dressings:

Clean, easy removal ⁵	✓
Reduced risk of skin damage ⁶	✓
Conformability	✓
Hydrolock® Technology	✓
Superior fluid retention vs. leading competitor ⁷	✓

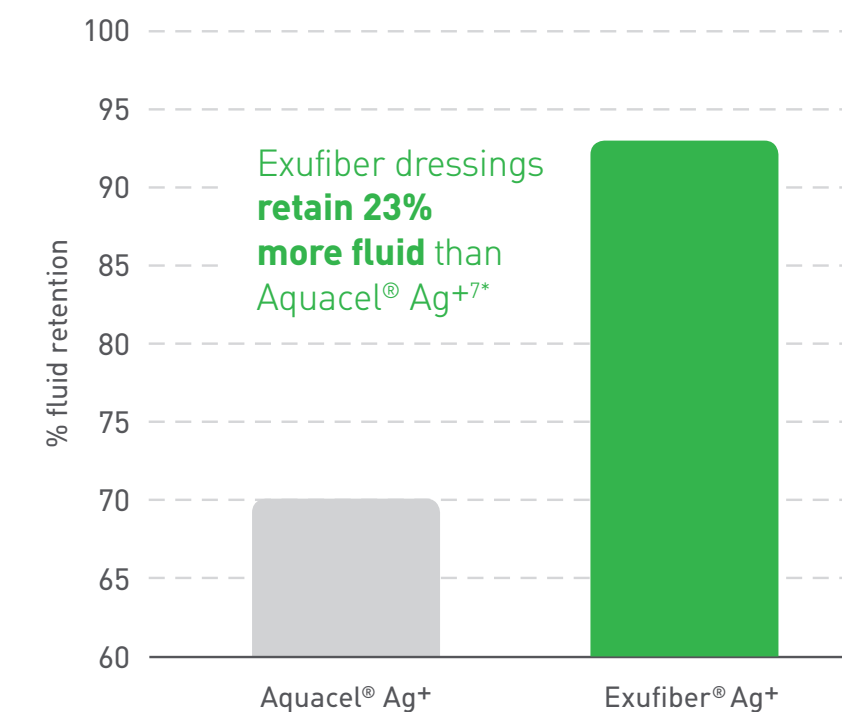

Reduced risk of skin damage

- > fluid retention reduces the risk of leakage⁷
- Reduced risk of maceration
- > performance when compressed⁷

Superior fluid retention vs. leading competitor

- Reduced risk of leakage; even when compressed

Reduced risk of skin damage: Superior fluid retention with Exufiber dressings^{6,7}

Indications for Use:

Exufiber® brand dressings may be used on medium to high exuding wounds: Exufiber Ag+ may be used as an effective barrier to bacterial penetration in order to reduce the risk of infection. Wounds include leg and diabetic foot ulcers, pressure ulcers, partial thickness burns, donor sites and other wounds that are prone to bleeding, traumatic wounds, surgical wounds that heal by primary intention, and oncology wounds with exudate.

Contraindications:

Exufiber® brand dressings are not intended for use on dry or full thickness burns. For external use only.

Precautions:

Exufiber® brand dressings should be inspected frequently and administered by health care professionals. Exufiber Ag+ should not be used in patients with sensitivity to silver or other contents of the Exufiber brand dressings. Frequent or prolonged use may cause permanent discoloration of the skin and there is limited data with regards to the use of silver containing dressings in children and neonates. Exufiber Ag+ should be removed prior to commencing radiation treatment and should avoid contact with electrodes or conductive gels during electronic measurements. Do not use Exufiber Ag+ together with oxidising agents such as hypochlorite solutions or hydrogen peroxide; interactions with cleansing agents, other than saline solution, has not been demonstrated.

Clean, easy removal ⁵	✓
Reduced risk of skin damage ⁶	✓
Conformability	✓
Hydrolock® Technology	✓
Superior fluid retention vs. leading competitor ⁷	✓
Contains silver sulphate	✓
Antimicrobial action ¹	✓
Reduced risk of infection ¹⁻⁴	✓
Superior antibiofilm action vs. leading competitor ⁸	✓

When compressed Exufiber Ag+ continues to fight microbes up to 7 days!

Superior antibiofilm action vs. leading competitor

- Reduced risk of infection

* Compression therapy (6kg: 40 mmHg equivalence); Exufiber dressings retained nearly all fluid absorbed.

Antimicrobial action / Reduced risk of infection

in vitro studies demonstrated:¹⁻⁴

- rapid antimicrobial action lasting up to 7 days
- effective against a broad range of pathogens including VRE and MRSA
- provides an effective barrier against bacterial penetration
- kills >99% of mould within 24hrs
- may reduce odour
